SUMMARY:

GFIA in Focus Australia will present hundreds of innovations for agri food production to 2,000 food producers, agribusinesses, policy makers, scientists and investors to revolutionise the way farmers produce food.

LONGER DESCRIPTION:

Designed to support the Australian Government's ambition for agriculture to become a \$100 billion industry by 2030, GFIA in Focus Australia will present hundreds of innovations and technologies for agri food production to 2,000 food producers, agribusinesses, policy makers, scientists and investors to revolutionise the way farmers produce food.

- FIND products and solutions to help you improve productivity, make efficiencies and save natural resources in the exhibition.
- LEARN from the experience of other farmers and growers in Australia by attending the conference and partner workshops.
- MEET with suppliers, partners and other farmers and growers by using the Meeting Request Service.

Find innovations to: Increase yields | Prepare for climate change | Save water | Control pests | Reduce food losses | Automate inputs | Make efficiencies | Manage energy use | Use ICT effectively | Improve nutritional value | Go organic | Improve soil health
